

# Fourth Down and Inches: Concussions and Footballs Make-or-Break Moment

When the 1905 football season ended, nineteen players were dead and countless others were critically injured. The public was outraged. The game had reached a make-or-break moment—fourth down and inches. Coaches, players, fans, and even the president of the United States had one last chance: change football or leave the field. Footballs defenders managed to move the chains. Rule changes and reforms after 1905 saved the game and cleared the way for it to become Americas most popular sport. But they didnt fix everything. Today, football faces a new injury crisis as dire as 1905s. With increased awareness about brain injury, reported concussions are on the rise among football players. But experts fear concussions may only be the tip of the iceberg. The injuries are almost invisible, but the stakes couldnt be higher: the brains of millions of young football players across the country. Award-winning author Carla Killough McClafferty takes readers on a bone-crunching journey from footballs origins to the latest research on concussion and traumatic brain injuries in the sport. Fourth Down and Inches features exclusive photography and interviews with scientists, players, and the families of athletes who have literally given everything to the game. Its fourth and inches. Can football save itself again?
